How are schools in this district doing?

Of the 26 schools in this district, 30.8% achieve recommended vaccination levels that help ensure community immunity* for all school required vaccines.

This means that 4,822 students in this district attend a school that does not achieve high protection from the diseases prevented by school-required vaccines.

How many students might be excluded in the case of a measles outbreak?

Out of the 9,122 students in this district, 425 might be at risk of exclusion from school in the instance of a measles outbreak because they either have an exemption to the MMR vaccine on file or do not have a record of MMR vaccination.

Average Fully Immunized Rate by Vaccine in this District

Kindergarten MMR Vaccination Rates by School (of schools with Kindergarten)

A vaccination level of 95%, as indicated by the green line, is needed to provide community immunity* against measles.

*Community Immunity is achieved when enough people in the community - roughly 95% for a disease like measles - are vaccinated to protect against the spread of disease. Maintaining high vaccine coverage is especially important for those who cannot be vaccinated for medical reasons or those too young to receive vaccines.
