Immunization Facts and Figures: 2018-2019
Overview of Colorado’s State House Districts

Percentage (%) of schools that achieve recommended coverage for all school required vaccines by Colorado House Districts

Recommended vaccination levels are
95% for DTaP, HepB, MMR, Polio and Varicella (chickenpox)
and
80% for Tdap (for schools that have 6th grade or higher, when Tdap is required)

Visit COLegIZ.org to learn more about district-specific rates.

House Districts in Colorado range from 0% - 83.3% of schools achieving recommended vaccination coverage.

Quick Facts

Colorado’s kindergarten MMR (measles, mumps, rubella) vaccination rate is the lowest in the U.S. at 87.4% for the 2018-19 school year. This numb...

There were over $55 million in hospital and emergency department (ED) charges to treat children in Colorado for vaccine-preventable diseases in 2017.

Colorado is one of only 15 states in the U.S. that allow personal belief exemptions for all school-required vaccines.

Nearly 25,000 Colorado students would potentially be excluded from school for up to 21 days in the instance of a measles outbreak because they have an exemption to the MMR vaccine on file.

Average Kindergarten MMR Vaccination Rate by Colorado House Districts

**How are schools in this district doing?**

Of the 27 schools in this district, 40.7% achieve recommended vaccination levels that help ensure community immunity* for all school required vaccines.

This means that 6,722 students in this district attend a school that does not achieve high protection from the diseases prevented by school-required vaccines.

**How many students might be excluded in the case of a measles outbreak?**

Out of the 13,208 students in this district, 737 might be at risk of exclusion from school in the instance of a measles outbreak because they either have an exemption to the MMR vaccine on file or do not have a record of MMR vaccination.

The bars above reflect the district's level of protection by disease, taking into account both community immunity levels and Healthy People 2020 Goals. For more information visit us at ImmunizeColorado.org.

**Kindergarten MMR Vaccination Rates by School (of schools with Kindergarten)**

A vaccination level of 95%, as indicated by the green line, is needed to provide community immunity* against measles.

The table below shows the vaccination rates for each school:

- Kyffin Elementary School
- Maple Grove Elementary School
- Mitchell Elementary School
- Prospect Valley Elementary School
- Fairmount Elementary School
- Compass Montessori - Wheat Ridge Charter School
- Edgewater Elementary School
- Stevens Elementary School
- Kullerstrand Elementary School
- Pennington Elementary School
- Lumberg Elementary School
- Wilmore Davis Elementary School
- Shelton Elementary School
- Free Horizon Montessori Charter School
- Beth Eden Baptist School
- Golden View Classical Academy
- Mountain Phoenix Community School

**Community Immunity** is achieved when enough people in the community - roughly 95% for a disease like measles - are vaccinated to protect against the spread of disease. Maintaining high vaccine coverage is especially important for those who cannot be vaccinated for medical reasons or those too young to receive vaccines.
