Immunization Facts and Figures: 2018-2019
Overview of Colorado’s State Senate Districts

Percentage (%) of schools that achieve recommended coverage for all school required vaccines by Colorado Senate Districts

Recommended vaccination levels are 95% for DTaP, HepB, MMR, Polio and Varicella (chickenpox) and 80% for Tdap (for schools that have 6th grade or higher, when Tdap is required)

Visit COLegIZ.org to learn more about district-specific rates.

Quick Facts

- Colorado’s kindergarten MMR (measles, mumps, rubella) vaccination rate is the lowest in the U.S. at 87.4% for the 2018-19 school year. This numb..
- There were over $55 million in hospital and emergency department (ED) charges to treat children in Colorado for vaccine-preventable diseases in 2017.
- Colorado is one of only 15 states in the U.S. that allow personal belief exemptions for all school-required vaccines.
- Nearly 25,000 Colorado students would potentially be excluded from school for up to 21 days in the instance of a measles outbreak because they have an exemption to the MMR vaccine on file.

Average Kindergarten MMR Vaccination Rate by Colorado Senate Districts

- **St Mary Catholic School**: 95%
- **St. Mary’s Academy**: 95%
- **Field Elementary School**: 95%
- **Crescent View Academy**: 95%

---

*Community Immunity* is achieved when enough people in the community - roughly 95% for a disease like measles - are vaccinated to protect against the spread of disease. Maintaining high vaccine coverage is especially important for those who cannot be vaccinated for medical reasons or those too young to receive vaccines.
