

ALLIANCE FOR HPV FREE COLORADO

HPVFreeCO.org

Health Systems Quality Improvement Project Overview

About the Alliance

The Alliance for HPV Free Colorado (Alliance) is a collaborative project funded by the Cancer Cardiovascular and Chronic Pulmonary Disease Grants Program working to implement a multidisciplinary, socioecological approach that results in a sustainable increase in completion of the vaccine series for 9-17-year-old.

The HPV vaccination prevents six types of HPV-related cancers

Project Components

Identifying Key Motivators to engage your Health or Dental System

Creating an Action Plan

Implementing your Action Plan

Meeting with Alliance Facilitators to support work

Creating a Sustainability Plan

One of the Alliance's main goals is to plan and implement a health systems approach to increase adherence to national HPV vaccination guidelines among practices and providers.

This involves participating in a Quality Improvement project with the Alliance.

Financial Incentive

The Alliance offers financial incentives to health systems willing to implement the QI project

| | |
