Immunization Facts and Figures: 2021-2022
Overview of Colorado’s State House Districts

Quick Facts

In 2021-22, 70,387 K-12 students entered Colorado schools without protection from one or more vaccines.

Colorado has seen a 10% decline in vaccine doses reported as administered across all pediatric and adolescent routine vaccines when comparing 2022 data to 2019 in the Colorado Immunization Information System (CIIS).

Hospital treatment for vaccine-preventable disease in 2020 and 2021 resulted in a combined $13 billion in healthcare charges.

27,927 Colorado kids were hospitalized or went to an emergency room with vaccine-preventable diseases in 2021.

**2021/2022 Immunization Data for Colorado House District 15**

**How are schools in this district doing?**

Of the 21 schools in this district, 27% achieve recommended vaccination levels that help ensure community immunity* for all school required vaccines.

This means that 9,289 students in this district attend a school that does not achieve high protection from the diseases prevented by school-required vaccines.

**How many students might be excluded in the case of a measles outbreak?**

Out of the 75,658 students in this district, 682 might be at risk of exclusion from school in the instance of a measles outbreak because they either have an exemption to the MMR vaccine on file or do not have a record of MMR vaccination.

**Average Fully Immunized Rates in this District**

- **Measles:** 94%
- **Mumps:** 94%
- **Rubella:** 94%
- **Polio:** 94%
- **Pertussis:** 94%
- **Varicella:** 94%

The bars above reflect the district’s level of protection by disease, taking into account both community immunity levels and Healthy People 2020 Goals. For more information visit us at ImmunizeColorado.org.

**MMR Vaccination Rates by Kindergarten**

Community Immunity* threshold for measles is 95%, as indicated by the green line.

- Ridgeview Elementary School: High Risk of Outbreak
- Evans International Elementary School: High Risk of Outbreak
- Springs Ranch Elementary School: High Risk of Outbreak
- Banffing Lewis Ranch Academy: High Risk of Outbreak
- Stetson Elementary School: High Risk of Outbreak
- Odyssey Elementary School: High Risk of Outbreak
- Remington Elementary School: High Risk of Outbreak
- Rocky Mountain Classical Academy: High Risk of Outbreak
- Henry Elementary School: High Risk of Outbreak
- Wilson Elementary School: High Risk of Outbreak
- James Irwin Charter High School: High Risk of Outbreak
- James Irwin Charter Middle School: High Risk of Outbreak
- Sand Creek High School: High Risk of Outbreak
- Horizon Middle School: High Risk of Outbreak
- Skyview Middle School: High Risk of Outbreak
- ALLIES: High Risk of Outbreak
- Springs Studio For Academic Excellence Charter School: High Risk of Outbreak
- Vista Ridge High School: High Risk of Outbreak
- Power Technical Early College: High Risk of Outbreak
- Pikes Peak Early College: High Risk of Outbreak
- Banning Lewis Preparatory Academy: High Risk of Outbreak

*Community Immunity* is achieved when enough people in the community - roughly 95% for a disease like measles - are vaccinated to protect against the spread of disease. Maintaining high vaccine coverage is especially important for those who cannot be vaccinated for medical reasons or those too young to receive vaccines.

Data made possible through HB14-1288 and subsequent rulemaking which requires schools and licensed child care centers to annually report immunization and exemption rates to the Colorado Department of Public Health and Environment (CDPHE).
