Quick Facts

In 2021-22, 70,387 K-12 students entered Colorado schools without protection from one or more vaccines.

Colorado has seen a 10% decline in vaccine doses reported as administered across all pediatric and adolescent routine vaccines when comparing 2022 data to 2019 in the Colorado Immunization Information System (CIIS).

Hospital treatment for vaccine-preventable disease in 2020 and 2021 resulted in a combined $13 billion in healthcare charges.

27,927 Colorado kids were hospitalized or went to an emergency room with vaccine-preventable diseases in 2021.

2021/2022 Immunization Data for Colorado House District 55

How are schools in this district doing?

Of the 26 schools in this district, 19% achieve recommended vaccination levels that help ensure community immunity* for all school required vaccines.

This means that 8,808 students in this district attend a school that does not achieve high protection from the diseases prevented by school-required vaccines.

How many students might be excluded in the case of a measles outbreak?

Out of the 63,750 students in this district, 688 might be at risk of exclusion from school in the instance of a measles outbreak because they either have an exemption to the MMR vaccine on file or do not have a record of MMR vaccination.

Average Fully Immunized Rates in this District

![Graph showing immunization rates for various diseases]

The bars above reflect the district’s level of protection by disease, taking into account both community immunity levels and Healthy People 2020 Goals. For more information visit us at ImmunizeColorado.org.

MMR Vaccination Rates by Kindergarten

Community Immunity* threshold for measles is 95%, as indicated by the green line.

New Emerson School At Columbus
Wingate Elementary School
Broadway Elementary School
Chipeta Elementary School
Orchard Avenue Elementary School
Dos Rios Elementary School
Pear Park Elementary School
Dual Immersion Academy School
Lincoln Orchard Mesa Elementary School
Mesa View Elementary School
Grande River Academy

Nisley Elementary School
Juniper Ridge Community School
Mesa Valley Community School
East Middle School
Orchard Mesa Middle School
R-S High School
West Middle School
Grand Junction High School
Redlands Middle School
Bookcliff Middle School
Landmark Baptist School

*Community Immunity* is achieved when enough people in the community - roughly 95% for a disease like measles - are vaccinated to protect against the spread of disease. Maintaining high vaccine coverage is especially important for those who cannot be vaccinated for medical reasons or those too young to receive vaccines.

Data made possible through HB14-1288 and subsequent rulemaking which requires schools and licensed child care centers to annually report immunization and exemption rates to the Colorado Department of Public Health and Environment (CDPHE).
