

The 2024 CDC Pink Book Course

Immunize Colorado is excited to host our first Centers for Disease Control and Prevention (CDC) Epidemiology and Prevention of Vaccine-Preventable Diseases (The Pink Book) course since 2018! The 2024 CDC Pink Book Course will take place on June 5 and 6, 2024 at the Double Tree Cherry Creek in Denver, CO. We will also host a separate supplementary Colorado-specific immunization update from CDPHE and local immunization experts on the afternoon of June 4. This event will draw approximately 200 attendees including physicians, nurses, nurse practitioners, physician assistants, medical assistants, pharmacists, immunization providers, program managers, nursing and medical students, and other medical support staff. The Pink Book course will be an excellent opportunity for these professionals to receive a comprehensive review of immunization principles and updates to the vaccine-preventable diseases recommendations from CDC facilitators.

Why Sponsor or Exhibit at The Pink Book Course?

The 2024 Pink Book course is an excellent opportunity to connect with healthcare professionals and vaccine providers across Colorado and learn about new vaccine updates and vaccine-preventable disease guidelines. This event is an ideal networking opportunity with a substantial audience who appreciates your commitment to keeping our community safe and healthy through immunization.

Your investment will assist us in providing programs and services that support increased access to immunizations and immunization education across the state. It will also allow us to provide the opportunity for CDC faculty to share critical vaccine education with the immunization and healthcare professionals involved in vaccine delivery in Colorado.

There are several different sponsorship opportunities to choose from to help meet your organization's goals. Please use the table below as a basic guide to the types of advertising, Pink Book involvement, and community engagement opportunities afforded by each Pink Book sponsorship and exhibitor level.

About Immunize Colorado

For over 31 years, Immunize Colorado has been essential in elevating the role vaccines play in preventing illness and promoting health for all of Colorado. As a statewide 501(c)3 nonprofit, *our mission is to protect Colorado families, schools, and communities from vaccine-preventable diseases.*

We work with healthcare providers, public health departments, businesses, policy makers, and community organizations to fulfill our mission. By focusing on six core program areas - coalition building, community outreach and awareness, provider, education, data translation and action, free and low-cost vaccines, and public policy - the coalition leverages the strengths and resources of our diverse members and community partners to maximize our efforts. We do all of this without accepting funding from vaccine manufacturers or distributors.
