About Immunize Colorado

For over 34 years, Immunize Colorado has been essential in elevating the role vaccines play in preventing illness and promoting health for all of Colorado. As a statewide 501(c)3 nonprofit, *our mission is to protect Colorado families, schools, and communities from vaccine-preventable diseases.*

We work with health care providers, public health departments, schools, businesses, policy makers, and community organizations to fulfill our mission. By focusing on six core program areas – coalition building, community outreach and awareness building, data translation, free and low-cost vaccines, provider education, and public policy – we leverage the strengths and resources of our partners to maximize our efforts.

The 2025 Big Shots Supporting Little Tots Luncheon

The Big Shots Supporting Little Shots Fundraising Luncheon will draw ~200 guests – including business leaders, policy makers, health care and public health professionals, and community advocates – and offer them the opportunity to learn about Immunize Colorado and the value of immunization. Guests will also hear from a special guest speaker (to be determined). **As Immunize Colorado’s sole fundraising event of 2025, the Luncheon will raise critical funds to support our work.**

Why Sponsor Immunize Colorado?

The Big Shots Supporting Little Tots Luncheon provides sponsors the opportunity to connect with the Colorado healthcare and business communities, build greater awareness for your organization, and demonstrate your support of a vital cause: protecting Coloradans from vaccine-preventable diseases. This has never been more important, as vaccine systems are coming under attack and outbreaks of diseases like measles and whooping cough are growing across the country. Colorado’s low vaccination rates make us vulnerable to outbreaks, especially for high-risk populations like babies, older adults, and those with compromised immune systems like cancer patients.

Your investment will assist us in providing programs and services that support increased access to and demand for immunizations for all Coloradans, including public awareness and information campaigns, vaccine-related advocacy and policy initiatives, and educational events for health care providers and community members.

There are several different opportunities to choose from to help you meet your organization’s goals. Please use the table on the following page as a basic guide to the types of advertising, public relations, and community engagement opportunities afforded by each sponsorship level.
